Dear Kurt,

I wanted to formally thank you for the excellent work you did in designing our website (www.mcgfl.com) and offer you a recommendation letter that you may share with your future customers. Your expertise has provided us with a product that exceeded our design expectations, will be more easily found by search engines and allows for easy updates that we can make ourselves. While other website designers may provide a product that looks nice, you have provided us with so much more! Functionality....

The website you designed incorporated all of the design features that were promised in our original conference call. This includes the flash graphics for show combined with the html coding that you recommended so that search engines could better find our site. The portfolio section you designed truly showcases our work! The request more information form utilized all the data collection needs that we had and will hopefully encourage even more potential customers to reach out to us. The search engine optimization and submittals that you are doing for us now should also allow for greater visibility on the web.

The screen cast instructions and the freeware software tools that you provided for us will allow us to easily maintain our own site. The fact that you've taught us to maintain the site ourselves will save us a lot of money that would have been spent with most other software designers who want to charge for a service contract or by the hour for making desired changes. Equally important, it means that information will be updated more frequently to provide customers with new content and the most up-to-date data possible!

Thank you again. It has been a pleasure working with you on this project.

Regards,

Brian Midolo
Corporate Secretary/Treasurer
